

## DocuChat Sample Document

This is a sample PDF for testing the DocuChat application.

### Chapter 1: Introduction

DocuChat is a PDF Q&A system that uses RAG (Retrieval-Augmented Generation)

to answer questions about uploaded PDF documents.

### Chapter 2: Features

- Upload PDF documents
- Ask questions about document content
- Get AI-generated answers with source citations
- View retrieved document snippets

## Chapter 3: Technical Architecture

The system uses OpenAI for embeddings and chat completion.

FAISS or ChromaDB for vector storage.

Streamlit for the user interface.

## Chapter 4: Usage

1. Upload a PDF document
2. Click 'Ingest' to process the document
3. Ask questions about the content
4. Review the AI-generated answers and sources
